

Tool Name: reset_jss_password.py

Description: Reset the password for a local account in Jamf Pro.

Usage:

```
reset_jss_password.py [-h] [-i INSTANCE] [-e ENVIRONMENT] [--profile PROFILE] [-co CASE] [-sb] [-v] [-c COLOR] [-m EMAIL]
```

Options:

-h, --help: show this help message and exit

-i INSTANCE, --instance INSTANCE: Specifies the instance name that will be used to gather information. This will match the Salesforce asset name.

-e ENVIRONMENT, --environment ENVIRONMENT: Specify an atlas environment

--profile PROFILE: Specifies the profile to use from your ~/.aws/credentials file.

-co CASE, --case CASE: Provide Jira case number for faster execution

-sb, --sandbox: Use the Everest Sandbox account

-v, --verbose: Verbose mode

-c COLOR, --color COLOR: Specify what color the output should be

-m EMAIL, --email EMAIL: Specify the email in which to send the new password
